

Imprivata Medical Device Access

Fast, secure access to Welch Allyn Connex vital signs devices

Key benefits:

- Help ensure clinical efficiency and caregiver satisfaction
- Increase visibility into user actions with PHI on medical devices
- Improve device security and compliance
- Improve the integrity of data being pushed to EHRs

Interconnected medical devices are valuable resources in the delivery of patient care, enabling data to be captured, aggregated, transmitted, analysed, and available for immediate review and clinical decision-making. However, with these advanced capabilities come new security threats, as each device represents a potential point of exposure of patient information.

Imprivata Medical Device Access now integrates with the Welch Allyn Connex® vital signs devices to enable secure authentication for clinical users accessing these devices. With Imprivata, healthcare organisations can help ensure the security and integrity of the data stored on and transmitted through these medical devices without impeding clinical workflows.

Balancing security and convenience

Healthcare organisations are now able to implement and enforce security measures without affecting caregiver satisfaction or productivity. With Imprivata Medical Device Access integrated directly into Welch Allyn Connex vital signs monitors, organisations can streamline authentication workflows and make secure authentication practical by empowering caregivers to lock and unlock access to these devices with a simple badge tap or scan.

The integration also enables visibility into how, when, and where caregivers access and interact with patient health information on medical devices.

Feature benefits

User authentication through proximity card

Imprivata Medical Device Access provides strong authentication via proximity badge tap or optical barcode scan to replace the need for manual entry of usernames and passwords when accessing medical devices.

Auditing and reporting

Imprivata Medical Device Access offers detailed reporting capabilities to help establish a secure, auditable chain of trust for medical device access.

Direct API-level integration

Imprivata Medical Device Access offers productised API-level integration directly with the Connex Spot Monitor and the Connex Vital Signs Monitor.

About Imprivata

Imprivata, the healthcare IT security company, enables healthcare securely by establishing trust between people, technology, and information to address critical compliance and security challenges while improving productivity and the patient experience.
