Imprivata proximity card readers

IMP-NV60 – a low frequency Nano proximity card reader

Benefits

- Fully tested and certified for Imprivata solution compatibility
- Delivered by the same expert team that supports all Imprivata solutions
- Expedited return for repair service
- Two-year warranty in the event of hardware issues

The complete authentication solution

Imprivata proximity card readers are core components of Imprivata OneSign® and Imprivata Confirm ID® solutions.

For hospital IT teams, Imprivata readers reduce complexity and simplify management by creating a single source for purchase, support, and maintenance. Imprivata proximity card readers support a broad range of different card types, and can support multiple card types on a single reader.

Flexibility and convenience for laptops and tablets

The Imprivata low frequency Nano proximity card reader, HDW-IMP-NV60, is ideal for the flexibility and convenience required for laptops and tablets, which do not otherwise have radio frequency (RF) capability. The next generation HDW-IMP- NV60 is a small form-factor proximity card reader. This is a 125 kHz proximity card reader, which, in its latest version, has an improved case design to make it more rugged to keep up with the demanding healthcare environment.

- The HDW-IMP-NV60 will read the HID prox card format
- The device is built at a right angle for laptops and tablets with a USB interface
- The device fits very close to the laptop or tablet case to minimize potential for damage

Availability

The HDW-IMP-NV60 is available for sale in Australia, Canada, the European Union, Switzerland, United Kingdom, and the United States.

Consolidated support

Consolidated support gives customers a single point of contact, accountability, and resolution for any technical issue.

- **Expedited return:** If a device needs to be swapped out, Imprivata includes an expedited return service as standard with all Imprivata readers. This fast, hassle-free return for repair process minimizes workflow disruptions and frustration for customers.

End point device support

Imprivata proximity card readers are supported on all Windows desktops and by the following manufacturers' thin and zero client devices.

Vendor	Type
Dell Wyse	Teradici
	Xenith
	ThinOS
	Windows
HP	Teradici
	Windows
Samsung	Teradici
IGEL	Windows
	Linux
Praim	Linux
	Windows
NComputing	Linux

Imprivata OneSign

Imprivata OneSign is the leading healthcare enterprise single sign-on and virtual desktop access platform that secures PHI, allows clinicians to focus more on patient care with fast, secure No Click Access® to patient data, and enables healthcare organisations to leverage the full benefits of their EHR and virtualization technology investments.

About Imprivata

Imprivata, the digital identity company for healthcare, provides identity, authentication, and access management solutions that are purpose-built to solve healthcare's unique workflow, security, and compliance challenges.
